Biotechnology & Bioengineering

Volume 46, 1995

April 5, 1995

1 Studies on the Lipozyme-Catalysed Synthesis of Butyl Laurate
N. N. Gandhi, S. B. Sawant, and J. B. Joshi

13 Occurrences at the Mineral—Bacteria Interface During the Oxidation of Arsenopyrite by Thiobacillus Ferrooxidans
M. G. Monroy Fernandez, C. Mustin, P. de Donato, O. Barres, P. Marion, and J. Berthelin

22 Effect of cDNA Copy Number on Secretion Rate of Activated Protein C
M. M. Guarna, C. H. Fann, S. J. Busby, K. M. Walker, D. G. Kilburn, and J. M. Piret

28 Properties of Microfiltration Membranes: Mechanisms of Flux Loss in the Recovery of an Enzyme
W. R. Bowen and N. J. Hall

36 Effects of Substrate Branching Characteristics on Kinetics of Enzymatic Depolymerization of Mixed Linear and Branched Polysaccharides: II. Amylose/Glycogen α-Amylolysis
J. T. Park and J. E. Rollings

43 A Modeling Study of Anaeobic Biofilm Systems: I. Detailed Biofilm Modeling
J. R. V. Flora, M. T. Suidan, P. Biswas, and G. D. Sayles

54 A Modeling Study of Anaerobic Biofilm Systems: II. Reactor Modeling
J. R. V. Flora, M. T. Suidan, P. Biswas, and G. D. Sayles

62 Genetically Engineered Charge Modifications to Enhance Protein Separation in Aqueous Two-Phase Systems: Charge Directed Partitioning
J. R. Luther and C. E. Glatz

69 Factors Affecting the Esterification of Lauric Acid Using an Immobilized Biocatalyst: Enzyme Characterization and Studies in a Well-Mixed Reactor
F. Vásquez Lima, D. L. Pyle, and J. A. Asenjo

80 Degradation of Quinoline by Immobilized *Comamonas acidovorans* in a Three-Phase Airlift Reactor
A. Ulonska, W.-D. Deckwer, and V. Hecht

Communication to the Editor

88 Cell Cycle and Cell Size Dependence of Susceptibility to Hydrodynamic Forces
M. Al-Rubeai, R. P. Singh, A. N. Emery, and Z. Zhang

April 20, 1995

93 Photochemistry of a Photosynthetic Reaction Center Immobilized in Lipidic Cubic Phases
A. Hochkoeppler, E. M. Landau, G. Venturoli, D. Zannoni, R. Feick, and P. L. Luisi

99 Surfactant Structure Effects in Protein Separations Using Nonionic Microemulsions
M. Vasudevan, K. Tahan, and J. M. Wiencek

109 Enzymatic Glucosylation of Hydrophobic Alcohols in Organic Medium by the Reverse Hydrolysis Reaction Using Almond-β-D-Glucosidase
G. Vic, J. Biton, D. Le Beller, J.-M. Michel, and D. Thomas

117 Metabolic Flux Distributions in *Penicillium chrysogenum* During Fed-Batch Cultivations
H. Jørgensen, J. Nielsen, J. Villadsen, and H. Møllgaard

132 Assessment of a Disc Stack Centrifuge for Use in Mammalian Cell Separation
R. Kempken, A. Preissmann, and W. Berthold

139 Development of a Predictive Description of an Immobilized-Cell, Three-Phase, Fluidized-Bed Bioreactor
J. N. Petersen and B. H. Davison

147 Heterogeneity Within Populations of Recombinant Chinese Hamster Ovary Cells Expressing Human Interferon-γ
S. R. Coppen, R. Newsam, A. T. Bull, and A. J. Baines

159 Reduction of Nitrate and Nitrite in a Cyclically Operated Continuous Biological Reactor
J.-H. Wang, B. C. Baltzis, and G. A. Lewandowski

Communications to the Editor

172 Reversed Micellar Extraction of Trypsin: Effect of Solvent on the Protein Transfer and Activity Recovery
Q.-L. Chang and J.-Y. Chen

175 The Oxidation of Chiral Alcohols Catalyzed by Catalase in Organic Solvents
E. Magner and A. M. Klibanov

180 Mathematical Model of Self-Cycling Fermentation
B. M. Wincure, D. G. Cooper, and A. Rey

May 5, 1995

185 Adhesion of Mammalian Cells to a Recombinant Attachment Factor, CBD/RGD, Analyzed by Image Analysis
A. Wierzba, U. Reichl, R. F. B. Turner, R. A. J. Warren, and D. G. Kilburn

194 Nitrite Inhibition of Denitrification by *Pseudomonas fluorescens*
J. S. Almeida, S. M. Júlio, M. A. M. Reis, and M. J. T. Carrondo

202 Modeling of an Industrial Alcohol Fermentation and Simulation of the Plant by a Process Simulator
F. Pascal, C. Dagot, H. Pingaud, J. P. Corriou, M. N. Pons, and J. M. Engasser

218 A Cometabolic Kinetics Model Incorporating Enzyme Inhibition, Inactivation, and Recovery. I. Model Development, Analysis, and Testing
R. L. Ely, K. J. Williamson, R. B. Guenther, M. R. Hyman, and D. J. Arp

232 A Cometabolic Kinetics Model Incorporating Enzyme Inhibition, Inactivation, and Recovery. II. Trichloroethylene Degradation Experiments
R. L. Ely, M. R. Hyman, D. J. Arp, R. B. Guenther, and K. J. Williamson

246 Selective Separation of Tryptic ß-Casein Peptides Through Ultrafiltration Membranes: Influence of Ionic Interactions
F. Nau, F. L. Kerhervé, J. Leonil, and G. Daufin

254 Altered Physicochemical Characteristics of Polyethylene Glycol Linked Beet Stem Oxalate Oxidase
P. Varalakshmi, K. M. Lathika, K. G. Raghavan, and B. B. Singh

258 Detachment of Biomass from Suspended Nongrowing Spherical Biofilms in Airlift Reactors
A. Gjaltema, L. Tijhuis, M. C. M. van Loosdrecht, and J. J. Heijnen

270 A Reagentless Amperometric Electrode Based on Carbon Paste, Chemically Modified with D-Lactate Dehydrogenase, NAD^+, and Mediator Containing Polymer for D-Lactic Acid Analysis. I. Construction, Composition, and Characterization
Hun-Chi Shu, Bo Mattiasson, Björn Persson, Geza Nagy, Lo Gorton, Suresh Sahni, Lin Geng, Leonid Boguslavsky, and Terje Skotheim

280 A Reagentless Amperometric Electrode Based on Carbon Paste, Chemically Modified with D-Lactate Dehydrogenase, NAD+, and Mediator Containing Polymer D-Lactic Acid Analysis. II. On-line Monitoring of Fermentation Process
Hun-Chi Shu, Lo Gorton, Björn Persson, and Bo Mattiasson

285 A Strategy for Construction of Industrial Strains of Distiller's Yeast
S. I. Ibragimova, D. G. Kozlov, N. N. Kartasheva, N. I. Suntsov, B. D. Efremov, and S. V. Benevolensky

291 A Model That Links Growth and Secondary Metabolite in Plant Cell Suspension Cultures
J. Guardiola, J. L. Iborra, and M. Cánovas

May 20, 1995

299 Cartilage Production by Rabbit Articular Chondrocytes on Polyglycolic Acid Scaffolds in a Closed Bioreactor System
N. S. Dunkelman, M. P. Zimber, R. G. LeBaron, R. Pavelec, M. Kwan, and A. F. Purchio

306 Cultivation of Cell–Polymer Tissue Constructs in Simulated Microgravity
L. E. Freed and G. Vunjak-Novakovic

314 A Kinetic Model for Product Formation of Microbial and Mammalian Cells
A.-P. Zeng

325 Citric Acid Production by *Candida lipolytica* Y 1095 in Cell Recycle and Fed-Batch Fermenators
K. D. Rane and K. A. Sims

333 Propane-Induced Biodegradation of Vapor Phase Trichloroethylene
D. W. Wilcox, R. L. Autenrieth, and J. S. Bonner

343 Effect of the Concentration of DODMAC and 1-Decanol on the Behavior of Reverse Micelles in the Extraction of Amino Acids
W. Wang, M. E. Weber, and J. H. Vera

351 Hydrodynamic Effects on BHK Cells Grown as Suspended Natural Aggregates
J. L. Moreira, P. M. Alves, J. G. Aunins, and M. J. T. Carrondo

361 Pathway Engineering for Production of Aromatics in *Escherichia coli:* Confirmation of Stoichiometric Analysis by Independent Modulation of AroG, TktA, and Pps Activities
R. Patnaik, R. G. Spitzer, and J. C. Liao

371 Monitoring of *Saccharomyces cerevisiae* in Commercial Bakers' Yeast Fermentation
R. T. Hatch and B. G. Veilleux

375 Protein Extraction from an Aqueous Phase into a Reversed Micellar Phase: Effect of Water Content and Reversed Micellar Composition
R. Hilhorst, M. Sergeeva, D. Heering, P. Reitveld, P. Fijneman, R. B. G. Wolbert, M. Dekker, and B. H. Bijsterbosch

Communication to the Editor

388 Determination of the Volumetric Mass Transfer Coefficient (k_La) Using the Dynamic "Gas Out–Gas In" Method: Analysis of Errors Caused by Dissolved Oxygen Probes
L. A. Tribe, C. L. Briens, and A. Margaritis

393 Removal of Water Produced from Lipase-Catalyzed Esterification in Organic Solvent by Pervaporation
S. J. Kwon, K. M. Song, W. H. Hong, and J. S. Rhee

396 Simultaneous Production of H_2 and O_2 in Closed Vessels by Marine *Cyanobacterium anabaena* sp. TU37-1 Under High-Cell-Density Conditions
S. Kumazawa and H. Asakawa

June 5, 1995

399 Fluorophore-Labeled Carbohydrate Analysis of Immunoglobulin Fusion Proteins: Correlation of Oligosacchride Content with In Vivo Clearance Profile
A. R. Flesher, J. Marzowski, W.-C. Wang, and H. V. Raff

408 Influence of Operating Variables on Liquid Circulation in a 10.5-m^3 Jet Loop Bioreactor
S. Garcia-Salas and L. B. Flores-Cotera

415 An Experimental Study on β-Cyclodextrin Carbonate Membrane Reactor in PNPA Hydrolysis
E. Drioli, M. Natoli, I. Koter, and F. Trotta

421 Preparation of Immobilized Enzyme with High Activity Using Affinity Tag Based on Proteins A and G
A. Kondo and T. Teshima

429 Effects of Subzero Temperatures on the Kinetics of Protease Catalyzed Dipeptide Synthesis in Organic Media
Å. Jönsson, P. Aldercreutz, and B. Mattiasson

437 Optimum Autoregulator Addition Strategy for Maximum Virginiamycin Production in Batch Culture of *Streptomyces virginiae*
Y. K. Yang, H. Shimizu, S. Shioya, K. Suga, T. Nihira, and Y. Yamada

443 Influence of Electrostatic Interactions on Partitioning in Aqueous Polyethylene Glycol/Dextran Biphasic Systems: Part I
A. Schluck, G. Maurer, and M.-R. Kula

452 Measuring Enzyme Hydration in Nonpolar Organic Solvents Using NMR
M. C. Parker, B. D. Moore, and A. J. Blacker

459 The Viability of *Scenedesmus bicellularis* Cells Immobilized on Alginate Screens Following Nutrient Starvation in Air at 100% Relative Humidity
V. M. Kaya and G. Picard

465 Mass Transfer and Temperature Effects on Substrate Utilization in Brewery Granules
M. M. Wu, C. S. Criddle, and R. F. Hickey

476 Competition Between Nitrate and Nitrite Reduction in Denitrification by *Pseudomonas fluorenscens*
J. S. Almeida, M. A. M. Reis, and M. J. T. Carrondo

485 A Model of the Binding, Entry, Uncoating, and RNA Synthesis of Semliki Forest Virus in Baby Hamster Kidney (BHK-21) Cells
K. U. Dee, D. A. Hammer, and M. L. Shuler

Communication to the Editor

497 Effect of a Single Nutrient Limitation on Poly-β-Hydroxybbutyrate Molecular Weight Distribution in *Alcaligenes eutrophus*
J. A. Asenjo, A. S. Schmidt, P. R. Andersen, and B. A. Andrews

503 Polysulfone Affinity Membranes for the Treatment of Amino Acid Mixtures
K. Rodemann and E. Staude

510 Two-Step Immobilized Enzyme Conversion of Cephalosporin C to 7-Aminocephalosporanic Acid
H. D. Conlon, J. Baqai, K. Baker, Y. Q. Shen, B. L. Wong, R. Noiles, and C. W. Rausch

514 An Autoclavable Glucose Biosensor for Microbial Fermentation Monitoring and Control
M. R. Phelps, J. B. Hobbs, D. G. Kilburn, and R. F. B. Turner

525 Intracellular Responses of Productive Hybridomas Subjected to High Osmotic Pressure
S. K. W. Oh, F. K. F. Chua, and A. B. H. Choo

536 Effect of Different Cell Culture Conditions on the Polypeptide Integrity and *N*-Glycosylation of a Recombinant Model Glycoprotein
M. Gawlitzek, H. S. Conradt, and R. Wagner

545 Conversion of Native Lignin to a Highly Phenolic Functional Polymer and Its Separation from Lignocellulosics
M. Funaoka, M. Matsubara, N. Seki, and S. Fukatsu

553 Biofilm Parameters Influencing Biocide Efficacy
R. Srinivasan, P. S. Stewart, T. Griebe, C.-I. Chen, and X. Xu

561 A Mathematical Model for the Growth of Mycelial Pellet Populations
A. J. Tough, J. Pulham, and J. I. Prosser

573 Physico-Chemical Properties of the Encapuslation Matrix and Germination of Carrot Somatic Embryos
R. Timbert, J.-N. Barbotin, A. Kersulec, C. Bazinet, and D. Thomas

579 High Viable Concentration Fed-Batch Cultures of Hybridoma Cells Through On-Line Nutrient Feeding
W. Zhou, J. Rehm, and W.-S. Hu

588 Hyphal Growth and Fragmentation of *Pencillium chrysogenum* in Submerged Cultures
J. Nielsen and P. Krabben

599 Process Optimization and Modeling of Chlorophenol Degradation by *Phanerochaete chrysosporium*
N. Pal, G. Lewandowski, and P. M. Armenante

610 Biocatalytic Synthesis of Acrylates in Organic Solvents and Supercritical Fluids: III. Does Carbon Dioxide Covalently Modify Enzymes?
S. Kamat, G. Critchley, E. J. Beckman, and A. J. Russell

621 Preparation and In Vitro Analysis of Microencapsulated Genetically Engineered *E. coli* DH5 Cells for Urea and Ammonia Removal
S. Prakash and T. M. S. Chang

Communications to the Editor

627 Effects of Temperature and Cycloheximide on Secretion of Clones Invertase from Recombinant *Saccharomyces Cerevisiae*
M. R. Marten, B.-H. Chung, and J.-H. Seo

631 Synthesis of Aspartame Precursor with an Immobilized Thermolysin in Mixed Organic Solvents
M. Miyanaga, T. Tanaka, T. Sakiyama, and K. Nakanishi

637 Index to Volume 46
